

Name: Irene Wairimu Karari

Graduation Year: 2019

Major: Masters in Business Administration (Strategic Management)

Position Vied for: Treasurer

Personal Statement

The foundation of every successful academic institution is built upon its thriving alumni community. The alumni community plays an invaluable role to its mother institution by boosting its image through their representation in the corporate sector and offering support in various ways towards improvement in the education quality standards within the institution. An association tasked with such an important role equally deserves a good representation by officials within its leadership.

Over three years' experience in running a business venture has significantly transformed my time, financial, leadership, strategy and communication skills. But above all, the one principle that I abide by that has enabled me to experience gradual growth and even stay afloat even in difficult economic times is staying true to my character. 'Your success stops where your character stops' is a principle deeply stand by. Accountability, trustworthiness and transparency are key principles that will characterize my leadership when serving as the treasurer in the alumni association.

I am confident of my capability to accurately represent the interests of the alumni members and ensure proper management of the alumni association's financial affairs.
